SOFTWARE ENGINEERING SKILLS

LANGUAGES & FRAMEWORKS

- TypeScript
- JavaScript
- Python
- PHP
- C#
- Next.js
- React
- Laravel

TECHNICAL SKILLS

DATABASES & APIS

- SQL
- MySQL
- SQLite
- Prisma
- REST APIs
- Eloquent ORM

TOOLS & PRACTICES

- Testing & Debugging
- Git & GitHub
- JIRA
- Requirements Analysis
- Full-Stack Dev
- Data Structures
- OOP

FRONTEND & STYLING

- HTML
- CSS
- Tailwind CSS
- Blade
- Responsive UI

LANGUAGES

- English - Fluent
- Swahili - Fluent

CERTIFICATIONS

- Cybersecurity Fundamentals - IBM SkillsBuild
BADGE, 2023
- IELTS English Language - Overall Band 7.0, CEFR C1
CERTIFICATE, 2023
- Mozilla Responsible Computing Challenge
CERTIFICATE, 2025

IAN OHURU

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Computer Science graduate specialising in Software Engineering, with two years of experience developing, testing and maintaining full-stack software applications. Skilled in building web and mobile applications from requirements analysis and interface development through database design, API integration, debugging and deployment support. Proficient in JavaScript, TypeScript, Python, PHP, SQL, React, Next.js, Laravel, REST APIs, Git, GitHub and JIRA, with a strong foundation in clean implementation, problem solving and reliable delivery.

WORK EXPERIENCE

Software Engineer

Jul 2025 - Jun 2026

AIMEX Software

- Developed and tested features for a mobile gym-management application serving members, trainers and administrative users.
- Implemented application workflows and supported backend functionality for membership, training and gym-management processes.
- Worked on database tasks, debugging and technical problem solving across the software delivery lifecycle.
- Tested user workflows, investigated defects and implemented improvements before delivery.
- Collaborated with stakeholders on requirements, usability, functionality and backend behaviour.

Full Stack Web Developer

Jun 2024 - Jun 2026

ElevenPlusGCSE - elevenpluscse.com

- Built and maintained the ElevenPlusGCSE web platform, covering interface updates, content structure and core functionality.
- Translated stakeholder requirements into working website features and ongoing platform improvements.
- Tested and debugged the platform to maintain a reliable user experience.
- Used user feedback to identify usability and functionality improvements.
- Trained learners in software tools and digital skills, strengthening technical communication abilities.

SELECTED PROJECTS

Sweet Layers - Cake Catalogue & Inventory Platform

github.com/OHURU-IAN/sweet-layers

Full-stack web application

- Built a public storefront and secure administrative dashboard for managing products, prices, images and categories.
- Developed complete create, read, update and delete workflows using Next.js, TypeScript, Prisma and SQLite.
- Implemented structured product-data management with type-safe database access.
- Designed the system for usability, data accuracy and efficient administrative workflows.

Next.js

TypeScript

Tailwind CSS

Prisma

SQLite

Student Management System

github.com/OHURU-IAN/student-management-system

Laravel web application

- Developed an administrative system for creating, viewing, updating and deleting student records.
- Implemented Laravel routing, Blade templates and Eloquent ORM over a MySQL database.
- Structured the database using Laravel migrations and model relationships.
- Tested administrative workflows to confirm correct data entry and record management.

PHP

Laravel

Blade

MySQL

Employee Weekly Timesheet

github.com/OHURU-IAN/employee-timesheet

AIMEX Homecare Services

- Built a print-ready timesheet application that records shifts and calculates daily and weekly hour totals.
- Implemented calculation logic and structured JSON data handling for repeatable timesheet generation.
- Created a Python utility that generates printable timesheets from JSON data.
- Optimised the output for efficient single-page printing and operational use.

JavaScript

HTML

Python

EDUCATION

BSc Computer Science, Major in Software Engineering

Riara University, Nairobi
SEP 2022 - JUN 2026

IELTS English Language Certificate

British Council / IDP / Cambridge Assessment English -
Overall Band 7.0, CEFR C1
2023

Mozilla Responsible Computing Challenge Certificate

Mozilla Foundation / Riara University
2025

Cybersecurity Fundamentals Badge

IBM SkillsBuild
2023
