TECHNICAL SKILLS

LANGUAGES

- TypeScript
- JavaScript
- Python
- PHP
- C#
- SQL

FRAMEWORKS & TOOLS

- Next.js
- React
- Laravel
- ASP.NET
- Tailwind CSS
- Prisma
- REST APIs
- MySQL / SQLite
- Git & GitHub
- JIRA

CONCEPTS

- OOP
- Data Structures
- Full-Stack Dev
- Machine Learning
- Network Security
- Embedded Systems
- Testing & Debugging

LANGUAGES

- English
- Swahili

CERTIFICATIONS

-  Cybersecurity - IBM SkillsBuild
2023
-  English Band 7.0 - Cambridge /
British Council
2023

IAN OHURU

SOFTWARE ENGINEER

Final-year Computer Science (Software Engineering) student with 5+ years building production software. I design, develop and ship full-stack and embedded systems end to end - from requirements and UI to testing, debugging and deployment. Strong in problem solving, clean architecture and collaborating across UX, product and engineering to deliver reliable systems on tight timelines.

EXPERIENCE

Software Engineer

Jul 2025 - Present

AIMEX Software

- Built and tested client-facing applications across the full stack, improving system reliability.
- Shipped front-end improvements and new UI functionality using modern web technologies.
- Owned requirements documentation, database tasks and technical problem solving end to end.

Software Engineer

Jun 2024 - Present

ElevenPlusGCSE - elevenplusgcse.com

- Designed, developed and debugged complex systems, drafting requirements and owning implementation.
- Partnered with UX designers to build user interfaces and iterate rapidly on user feedback.
- Collaborated on the design and development of embedded processing systems.

SELECTED PROJECTS

Sweet Layers — Cake Catalogue & Inventory Platform

github.com/OHURU-IAN/cake-w3b

Full-stack web application

- Built a public storefront plus a password-protected admin dashboard to add, edit and manage cakes with photos, pricing and categories.
- Implemented type-safe data access and persistence with Prisma over a SQLite database.

- Next.js
- TypeScript
- Tailwind CSS
- Prisma
- SQLite

Student Management System

github.com/OHURU-IAN/student-management-system

Laravel web application

- Developed an administrative system to manage student information and records with full CRUD workflows.
- Used Laravel routing, Eloquent ORM, migrations and Blade templating over a MySQL database.

- PHP
- Laravel
- Blade
- MySQL

Employee Weekly Timesheet

github.com/OHURU-IAN/employee-timesheet

AIMEX Homecare Services

- Built a print-ready timesheet app that logs shift times and auto-calculates daily and weekly hour totals.
- Added a Python utility to generate timesheets from JSON data, optimised for single-page printing.

- JavaScript
- HTML
- Python

EDUCATION

DEC 2025

BSc Computer Science - Software Engineering

Riara University, Nairobi

2023

Cybersecurity Certificate

IBM SkillsBuild
